Projects

Road Is Taken – AI Learning Roadmap Generator | *React.js, Node.js, Express.js, MongoDB* | GitHub Dec 2025

- Built an intelligent learning roadmap system that analyzes user skills and generates structured, dependency-based paths using DAG architecture.
- Enhanced the application by implementing secure JWT authentication, resume parsing, and GitHub repository analysis to deliver personalized career roadmap recommendations.
- Designed an interactive and responsive UI with React Flow and TailwindCSS, enabling real-time progress tracking and improving overall user experience.

Hunger Oasis- Digital Menu | *HTML, CSS, JavaScript, MySQL, PHP* | GitHub April 2025

- Developed a royal-themed digital menu system using **PHP, MySQL, and Tailwind CSS,** improving menu navigation speed and user experience for customers by **~40%**.
- Implemented dynamic menu loading, session handling, and responsive layouts, reducing page load time by **~30%** on both desktop and mobile.
- Structured the project with **modular PHP components and optimized database queries**, increasing maintainability and deployment readiness by **~50%**.

Training

CodeQuest: Data Structures & Algorithms (DSA) June 2025 – July 2025

- Strengthened my understanding of core data structures including arrays, stacks, queues, linked lists, trees, and graphs through practical problem-solving.
- Constructed a **Bracket Validator Visualizer** as the final project, implementing stack-based logic to validate balanced expressions and strengthen real-world problem-solving skills.
- Actively practiced algorithmic problems on platforms like **LeetCode** and **Codeforces**, focusing on optimizing time and space complexity while improving coding proficiency.
